- Creating Database

I have created database named 'company'
I have learnt that database also called schema

To create databse here is query:

CREATE DATABASE company;

Instead of this you van also write this query:

CREATE SCHEMA company;

- Creating Tables

Table 1:Department

Columns: departmentId (primary key,not null)

departmentName(not null)
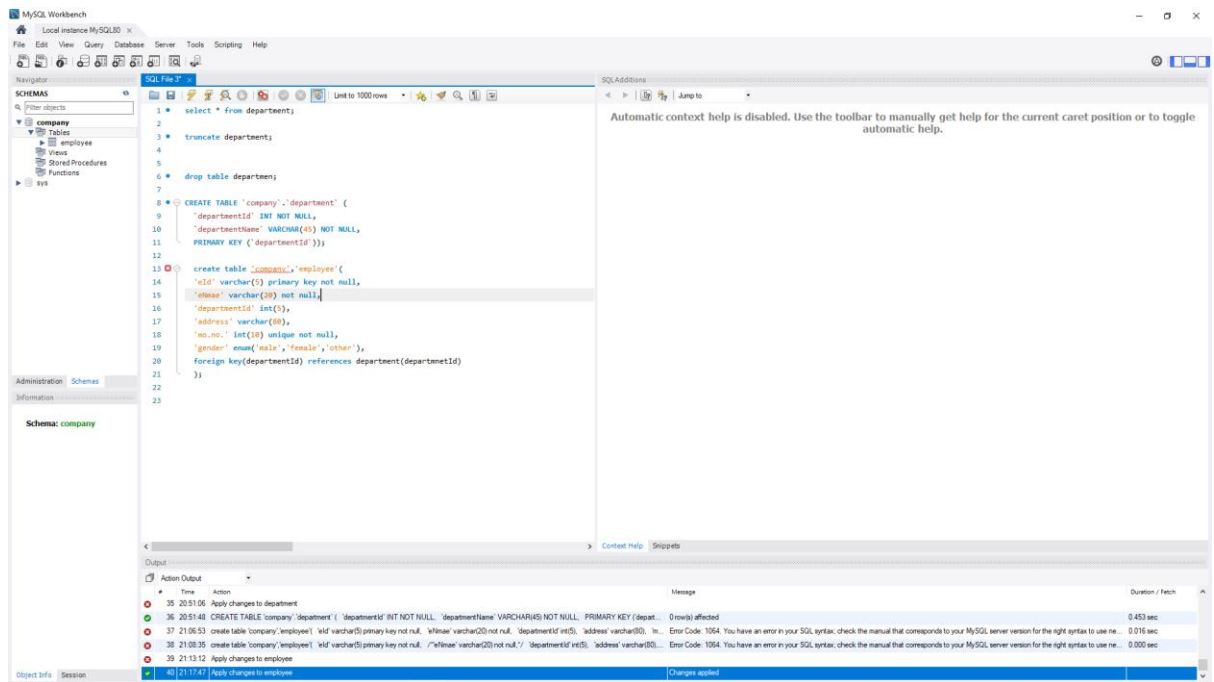

Table 2: Employee

Columns: eid (primary key,not null)

Ename (not null)

departmentId (references deprtment)

address

mo.no

gender

- ER diagram of above tables:
